

Risks of bad use of AI in fast growing regions of Africa and Haiti due to lack of control of good data quality and weak corporate governance

Eliodor Ednolson G.M. - Haiti  
Dzoulou Vinci Savitri - Congo

December 13, 2018

# Demographic risk and opportunity

- **Haiti population** : 11 million
- **Africa population** : 1 Billion

**Opportunity** : Better decision-making to improve live conditions.

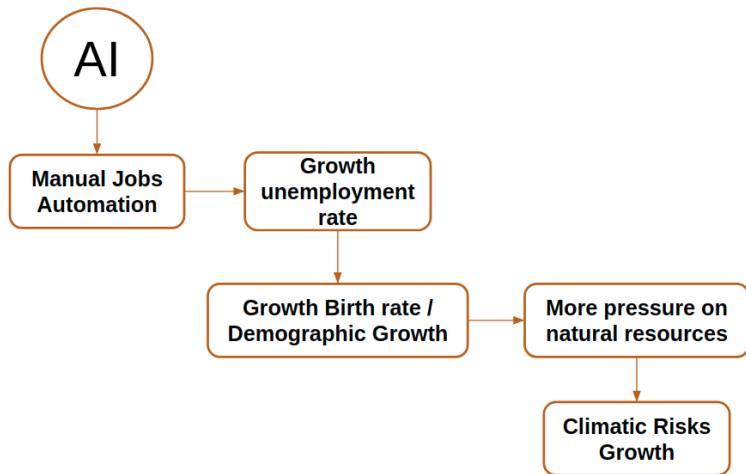

*Transport, Medicine, Agriculture, etc.*

**Risks** : Wrong decision, data theft due to lack of control/security, use for malicious purpose, etc.

*Frustrations, Access to health/loan, Increase of discrimination, etc.*

# Climate risk

- Haiti unemployment rate : 70%
- Africa unemployment rate : 55- 75%

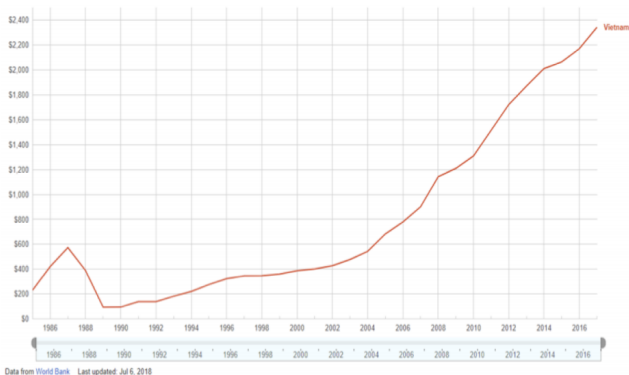

# How to improve living standards through better data management, so for what ethics? (agriculture, medicine, electricity ...)

- The larger the population is, the most is the data collected.
- Data is knowledge. Knowledge is an inexhaustible resource.
- With a good data management :
  - *Better decisions can be made through the extraction of much more relevant information in many areas, this to improve the living condition.*

# What education and technology to deploy in the countries?

- **Young people and leaders :**
  - Educate, train and sensitize to new emerging technologies.
  - Develop their awareness around future technology.
- **New technology:**
  - Good data management and governance tools for better decision-making..
  - Best artificial intelligence tools to support areas like :
    - *health, transportation, agriculture, etc.*

# Our contribution to Africa and Haiti related to knowledge and experiences acquired in Vietnam(1/2)

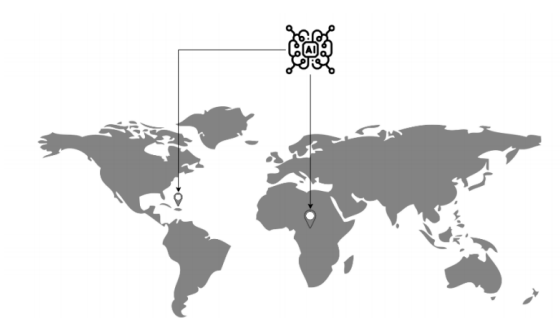

<https://www.weforum.org/agenda/2018/09/how-vietnam-became-an-economic-miracle/>

# Our contribution to Africa and Haiti related to knowledge and experiences acquired in Vietnam(2/2)

## Our Contribution

- *Training / Sharing knowledge :*
  - New technology, Artificial Intelligence, Data management, Ethics, Data governance, etc.
- *Innovation :*
  - Deploy new solutions, Bring our expertise to startups.

*Improve life condition in Africa and Haiti*

Thank you 😊
